Profile Summary

DevOps Engineer with over a year of experience in Kubernetes, Docker, and CI/CD, backed by a strong foundation in MERN stack development. Passionate about deploying scalable, secure applications and exploring blockchain technology

Education

Poddar International College

Jaipur

Bachelor of Computer Application

2023 – 2026

- Represented college in Multiple hackathons
- Achieved **Top 5% rank** in class

Skills

Technical skills:

Tools: MERN, Docker, Kubernetes, NGINX, CI/CD, Azure, Prometheus/Grafana, GitHub Actions

Experience

NEAR Foundation

Remote/Switzerland

Blockchain Security Intern

Apr 2021 – Jul 2021

- Collaborated with the security team to identify and patch a critical smart contract vulnerability, preventing crypto fund losses .
- Gained exposure to Blockchain protocols, decentralized architecture .

Projects

Full-Stack Chat App Deployment

Engineered a MERN-stack application integrated with PyTorch to analyze video streams for facial and audio inconsistencies, improving detection accuracy by 7% and reducing false positives.

start – end

- Deploying Three-tier app (React, Nodejs, MongoDB) in **K8s (Kind)**
- Containerized, Debugged Container images mismatches and port-forwarding
- Orchestrated pods in a scalable cluster, improving system uptime by 98.9% and ensuring high availability.

Deepfakes Detection

Nov 2025 – Oct 2025

- Led a team of 5 developers to address the cybersecurity threat of deepfakes using AI and MERN stack.
- Integrated PyTorch models to analyze facial and audio inconsistencies, improving detection accuracy by 7% and reducing false positives.
- Automated the lifecycle using Docker and ArgoCD-managed Kubernetes, increasing deployment efficiency by 60% and achieving 98% uptime

Certifications

Introduction to DevOps - **IBM**
