

DEVANSH CHOUHAN

Jaipur | dev7nsh@gmail.com | chouhan.me | linkedin/devanshchouhan

SUMMARY

Self-taught developer with hands-on experience in full-stack web development, blockchain integration, and cloud-native systems. Skilled in React, Node.js, Docker, and CI/CD pipelines, with internship experience in blockchain security and decentralized applications. Passionate about building scalable applications and delivering impactful solutions.

WORK EXPERIENCE Blockchain Developer Intern

Jan 2025 - mar 2025

- Developed a peer-to-peer USDT → INR platform, enabling seamless on/off-ramp transactions.
- Integrated Web3 wallets for secure authentication, improving onboarding speed by 30%.
- Built dashboard tools for node rewards and earnings, used by early testers.
- Tech Stack: Node.js, React, Web3.js, MongoDB, NGINX

Blockchain Security Intern – NEAR Foundation

APR 2021 - JULY 2021

NEAR Foundation

- Analyzed and cleaned healthcare data to improve security insights.
- Built data visualizations used in monthly team reports.
- Identified trends in feedback that led to a 15% improvement in user satisfaction.
- Documented analysis processes for reproducibility and future scaling.

EDUCATION

Bachelor of Computer Application

Rajasthan University - Poddar International College

Aug 2023 - Aug 2026

- Relevant Courses: Data Structures, Web Dev, Databases, Software Engineering

TECHINACAL SKILL

Web Technologies & Frameworks: React.js (Intermediate), Node.js/Express (Advanced), HTML/CSS/Tailwind (Expert), NGINX, Docker (Advanced)

Blockchain & Web3: Solidity (Beginner), Node Setup/RPCs (Proficient)

AI / ML & APIs: OpenAI API/GPT-4, LangChain, Vector DBs (Intermediate)

Cloud & DevOps: Docker, Compose, Linux VPS Management, GitHub Actions (Proficient)

Tools: Git, GitHub, VS Code (Expert), Postman, Figma, OBS

PROJECTS

🚀 Featured Projects

- **P2P USDT ↔ INR Platform** – Peer-to-peer crypto exchange with chat.
- Tech: Node.js, Express, WebSockets, MongoDB | [GitHub](#)
- **Email Collector Tool** – Scrapes public sites for emails.
- Tech: Puppeteer, Node.js | [GitHub](#) | [Live](#)
- **Secure Auth System** – Role-based login & access control.
- Tech: React, Node.js, JWT, MongoDB | [GitHub](#)

CERTIFICATES

Introduction to DevOps - IBM

APR 2025

Cloud-Native Computing, Behavior-Driven Development (BDD), CI/CD, Microservices, Performance Metrics, Team-Oriented, Cross-Functional Collaboration, Culture Transformation
